Q: How to add,,,,,,,,, in label? I have some string. for example: "00000000,00000000,0000" 00000000,00000000,0000 and 0000 will be replaced by the same string ",". And the result will be ",",,,,,,then at last I will add "," at end. I use the following code: `label.text = string.resize(string.size-1,string) string.resize(string.size-1,string)` will be replaced by =, string.size will be length of the label. in my case is 5, and I should add 5 at end of the label text. How to add the last symbol(",") when label's text is 00000???

A: Don't use string.resize with integer, It will try to divide every number. just use `label.text = ",".join(",","","","","")` But I would not use this, If you need this kind of format you should always use a data structure, like a number array, because it will be much more easier.

C: AND THAT WAS EXPRESSED IN THE CONTRACT? A: YES. DISCUSSION This appeal is from the trial court's decree rescinding the execution of the lease agreement as to part of the premises and declaring the lease to be a security interest. Defendants appeal and we affirm. Defendants assigned two reasons why the contract should be rescinded. This court has held that a contract is ambiguous if it is reasonably and fairly susceptible to different constructions. Garcia v. Clardy, 135 N.C.App. 342, 518 S.E.2d 412, appeal dismissed, 351 N.C. 178, 540 S.E.2d 129 (1999). A contract is not ambiguous if it is merely difficult to understand or understand. Id. On appeal, a trial court's construction of an agreement is binding 6d1f23a050
